

CORGLA-2025

The project is part of the African Great Lakes Region Consortium and is supported by the Quaker Africa Interest Group. It is working to provide school fees and educational supplies for orphans in the DRC.

Due to financial pressures, orphans frequently abandon school and resort to living in the streets, trying to earn an income as best they can. The project supports over 100 children and young people of various ages who have not had the chance to go beyond the primary school leaving certificate, providing them with the opportunity for secondary and university education, boosting their confidence and knowledge and preparing them for a fulfilling and productive life.
