

## VoH 025

The project provides support for 30 vulnerable orphaned children, with the aim of enabling them to develop their skills, self-confidence, and ability to become independent and responsible adults. Education remains a challenge for orphaned children in Burundi as some start their studies but cannot finish due to lack of means and support. The project will support the children in their educational needs including; payment of school fees, support for them with school supplies and after-school follow-ups, the aim of which is to allow each child to have access to education regardless of their social status.
